

# Red logo Green heart

Quality and protecting the environment are the key components of Sielaff's company policy. Through the existence and implementation of our company policy in all areas we strive to be role models regarding quality, environmental sustainability, reliability and precision of our products, services and processes. The compliance of our company policy is regularly reviewed and any recognised deviations adjusted.

Our company policy is orientated towards the interests of our customers and other interested parties.

We aim to achieve first class results through our work so that our customers are satisfied and remain loyal to us for many years. At the same time we want to contribute towards preserving our natural habitats and protecting our environment from harmful impacts. Responsible use of resources such as raw materials, auxiliary materials and fuel, water, energy, as well as our machines and installations. Furthermore our aim is to reduce our products' CO<sub>2</sub>- consumption during manufacture as well as in use. We also commit ourselves to preventing or as far as possible reducing

environmental impacts, e.g. in the form of emissions, waste water and waste materials. Compliance with statutory legislation and other applicable requirements we regard as being the minimum. Our quality and environmental policy serves as a guide for developing and implementing our quality and environmental objectives. Our company's mindset and actions focus on our customers. Our main objective is complete customer satisfaction. As partners, our customers are the key to the success of our company.

Our support and inclusion policy provides a basis for our motivated and qualified workforce to identify themselves completely with the company and its responsibilities. Our focus is on innovative technology, top quality and appealing design. We pay particular attention to conserving natural resources and working closely with all partners.

The improvement in our quality levels and the reduction of our environmental effects are by virtue of continual improvement of our procedures, processes as well as products and services.
