SiLine® series – a perfectly designed line

**Illustration: line example,
RB RA design with design package A
(decorative LED stripes):**

SiLine® GF M	1830 x 990 x 895 mm*
SiLine® HG TS7	1830 x 700 x 755 mm*
SiLine® SiOne S	1830 x 780 x 711 mm*
SiLine® Snack M	1830 x 990 x 895 mm*

** Housing dimensions may vary due to
add-on parts and accessories.*

Further variants:

SiLine® GF L, SiLine® Combi M, SiLine® Combi S,
SiLine® Snack S, SiLine® HG TS27.

The design of the SiLine® series adapts effortlessly
to different kinds of locational requirements. It is
not just the modern look, but also the state-of-the-
art technology that makes our SiLine® series the
perfect vending solution for your point-of-sale.

Variable look – attractive design

The SiLine® line comes in two designs – RA
and VA. In VA design, the SiLine® is made of
matt painted steel with eye-catching stainless
steel on the lower decorative door panel. By
contrast, the RA (standard) design is made
almost entirely of matt painted steel.

The LED stripes in design package A are a
real eye catcher everywhere.

The high-quality workmanship of the SiLine® line is
always recognisable at first glance. With their
standardised line design, the vending machines
are universally welcome at any location and blend
in perfectly with all surroundings. Their modular
design makes SiLine machines particularly
service-friendly and recyclable.

Talent and Technology

The operating concept – simply ingenious

The standardised touchscreen operating concept is a common feature of the entire SiLine® series. Highlight additional products with a virtuoso sales show or provide customers with promotional offers and product information – our touchscreen is the ideal communication technology between you and your customers. And it is as easy to operate as a smartphone.

Less is more: Astonishingly quiet

The innovative SiLine® vending machines are particularly quiet in product delivery. They are therefore ideal for lobby and reception areas.

Fits the requirements of any location

Whether it's classic at-work catering, as a maxibar or in direct marketing: The innovative SiLine® series has the right SiLine® for any location.

Built sustainably for the future

Sustainability plays a key role in the SiLine® vending machine range. Production at Sielaff focuses on green processes and recyclable materials. The modular concept is persuasive: Made from 99.7%* recyclable materials. All SiLine® vending machines are telemetry-enabled or can also share data via USB and MDB. Sophisticated software monitors the refrigeration unit and alerts users if the door is opened. The energy saving mode can reduce power consumption either specifically and individually at programmable times.

The overall package is just right

The SiLine® series creates the perfect stage for your products. No matter whether they are drinks, snacks or non-food: Behind the large glass front with the LED illuminated interior customers will find a huge variety on up to eight shelves in GF machines for cold drinks and seven in the Snack and Combi. Fresh food cooling is also available. The Sielaff lift system ensures gentle dispensing of glass bottles, fizzy drinks and fragile products.

Always up to date

All of our SiLine® vending machines are equipped with a REST API as the gateway to potentially unlimited connectivity and application options for devices and functions.

Every SiLine® vending machine can be operated as a standalone device or as part of a team, as an independent vending machine or auxiliary machine. Auxiliary machines can be turned into standalone vending machines and vice versa in no time at all. Each vending machine comes with a 7" touch display and intelligence capabilities. This ensures that sets of devices can be easily adapted to new circumstances when the need arises.

The universal sales talent

There are virtually no limits when it comes to sales. In fact, everything is possible, from hotel provisions to regional products and seasonal promotions, indoor and outdoor alike.

Request a personal quote for the SiLine® series – you will be surprised.
