

# CO<sub>2</sub> cylinder exchange vending machine

SiLine® SiLoop CO2

# SiLine® SiLoop CO2

## Safe and simple cylinder exchange

### The smart solution for exchanging CO<sub>2</sub> cylinders

The SiLine® SiLoop CO<sub>2</sub> is a modern, fully automated solution for the purchase and exchange of CO<sub>2</sub> cylinders. Available at any time and without the need for additional staff. The vending machine expands your range regardless of opening hours and staff availability and creates an additional, attractive source of revenue directly at the point of sale.

It is consciously designed for simple and intuitive use. Empty CO<sub>2</sub> cylinders are inserted into the top of the vending machine and automatically detected. New cylinders can be purchased as an exchange or independently. They are issued automatically after successful payment. Up to four cylinders can be purchased simultaneously in each process.

### Intuitive operation

The large touch display ensures clear, user-friendly interaction. Menu navigation is clearly structured and guides the user step by step through the entire process – from selection to dispensing. Operation is self-explanatory, with reduced error susceptibility and a consistently positive user experience.

### Cashless payment – secure and efficient

The SiLine® SiLoop CO<sub>2</sub> is built exclusively for cashless payment. Card payment ensures a fast, secure and reliable process. This simplifies operations for operators who no longer need to handle cash and increases security.

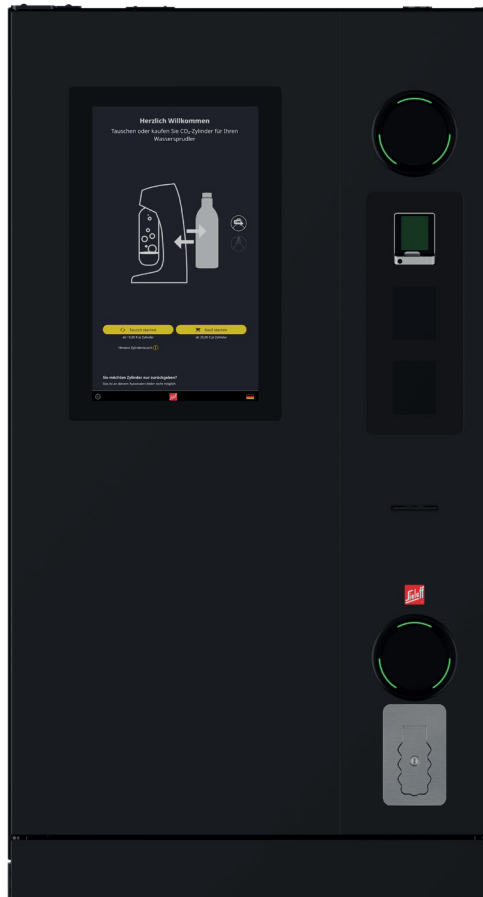

### Flexible range, strong performance

With up to 10 integrable cylinder types, the range is highly adaptable – from different systems to extended product variants. The system reliably distinguishes between click and screw cylinders.

With a capacity of up to 140 CO<sub>2</sub>-cylinders, the SiLoop is also ideally suited for heavily frequented locations and ensures outstanding product availability with efficient operation.

### Features

- Quick delivery and dispensing of CO<sub>2</sub> cylinders around the clock
- Replacement or purchase of up to four cylinders per process
- Large touch display with intuitive, user-friendly menu navigation
- 100% cashless – secure and fast card payment
- Distinction between click and screw cylinders
- High capacity – space for up to 140 cylinders
- Can integrate up to 10 different cylinder types (e.g. flavours and click and screw system)

High capacity with space for up to 140 cylinders

The wavy design of the locking lever protection system ensures that the SiLine® Series cannot be prised or levered open

Cabinet and door  
available in jet black (RAL 9005)

\* Machine dimensions may  
vary due to add-on parts and  
accessories

### SiLine® SiLoop CO2 Dimensions

- 1,835 x 990 x 842 mm  
(height x width x depth)\*

### Weight

- Approx. 310 kg

### Electrical data

- 220 – 230 V / 50 Hz / min. 10 A

### Power consumption

- max. 150 W

# Sielaff – is synonymous with “Made in Germany“
