Series software for Sielaff snack and cold drinks machines

We would like to inform you of the status of the software versions on our snack and cold drinks machines as delivered from the factory. Credit processing has been improved in the latest software versions.

Improvements made to credit processing

Improvements have been made to the processing and display of prices in currencies which have no decimal places.

A potential problem when pressing the refund button several times during the vend process when using non-German menu-navigation has been eradicated.
