

TECHNICAL INFORMATION

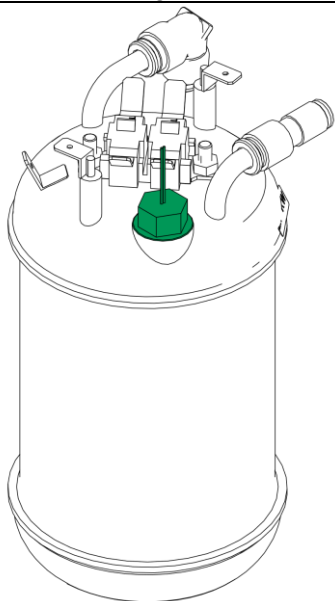

Date: 14.02.2023
TI: 0323
Type of vending machine: HG/HO Espresso Variants

New temperature sensor for 2.0 kW and 2.7 kW boilers

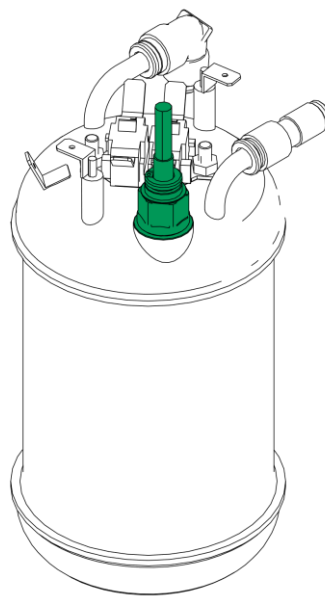

The screwed temperature sensor of the espresso boiler is no longer available. Therefore, from **production week 50/2022** with **serial number 90538625**, a screw-in fitting with quick coupling with a plugged-in temperature sensor will be used.

The temperature sensor has identical performance characteristics as the original sensor.

Previous boiler with temperature sensor with integrated screw-in fitting

New boiler with temperature sensor for screw-in fitting

For spare parts, the temperature sensor set-up kit with item number 420 50 140 00 must be ordered in future. In addition to the screw-in fitting and the temperature sensor, this also includes detailed assembly instructions.
