

TECHNICAL INFORMATION

Date: 20.10.2023
TI: 0823
Machine type(s): HO Siamonie Smart

New pump mount for Siamonie Smart

As we continually endeavour to improve our product quality the Siamonie Smart pump mount has been optimised. In future, the new mount for the oscillating piston pump will be produced using a conical compression spring to absorb pump vibration during operation. The new pump mount will be fitted from production week 40/2023, machine serial number 90549834.

It will not be possible to retrofit the individual pump mounts due to modification of the support. Individual parts or the complete water unit can be ordered if spare parts are needed.

417 01 020 00	Water unit premounted, with mains water	
417 02 020 00	Water unit premounted., mains water + water tank
