Alternative brewing valve

Due to the difficult procurement situation worldwide we have experienced problems in obtaining this key component. In order to continue to maintain the delivery chain, as a temporary measure, we are fitting an alternative brewing valve, which has been successfully used in the past in the production of all floor-standing machines with an espresso brewing unit and the Siamonie Smart.

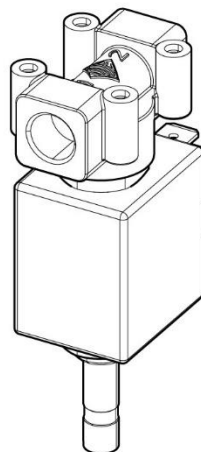

From production week **KW 25/2022** machine serial number **90534422** the alternative brewing valve from A&K Müller will be fitted temporarily.

A&K Müller Valve

Part number: 409 00 940 00

SFS Valve

Part number: 414 00 941 00

If a spare part is required for the machines affected, part number 409 00 940 00 solenoid valve 3/2 should be used for the A&K Müller valve. For machines produced before the date specified and fitted with an SFS valve, part number 414 00 941 00 solenoid valve 3/2 should be used.
