Additional metal plate for the douchette on the HTP-brewer

As we continually endeavour to improve our products an additional metal plate is now being fitted on the inlet piston on the plastic brewer. This enhancement is necessary in order to enable the operation of a specially developed testing device.

HTP Brewer

4070161500

In the HO-sector the reinforcing plate will be fitted from production week 13/2019, machine serial number 90483086

In the HG-sector the reinforcing plate will be fitted from production week 13/2019, machine serial number 90479218.
