Machine type/s:

Siamonie Smart

Orange locking slider for bean container

As we continually endeavour to improve our products the locking slider for the Siamonie Smart Mono and Duo bean containers will in future be produced in RAL 2004 pure orange. By introducing this new colour the locking mechanism will be easier to locate in the machine. Pull on the lock to close the container to enable it be removed from the machine. Push the lock backwards to anchor the bean container in the machine which will also release the beans.

From serial number 90483177, production week 14/2019 the locking slider (Part no.: 417 00 316 00 LOCKING SLIDER FOR BEAN CONTAINER) will be available as standard in orange.
