Machine type/s:

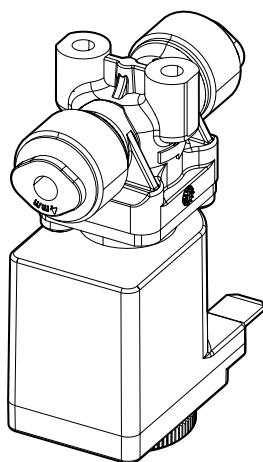

HG

Alternative brewer valve HG-floor-standing machines

We have experienced some problems obtaining parts due to our supplier not being able to fulfil orders. In order to be able to supply machines, an alternative brewer valve has been fitted in the HG-floor standing machines, which we have successfully used in the past.

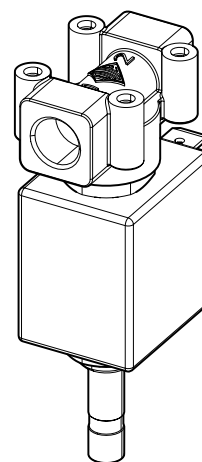

From production week 15/2020 to 22/20 A&K brewer valves instead of SFS valves have been fitted. Machines with serial numbers 90498820 to 90499235 have been fitted with the alternative brewer valves.

A&K Valve

Part number 409 00 940 00

SFS Valve

Part number 414 00 941 00

When ordering spares parts for machine serial numbers 90498820 to 90499235 part no. 409 00 940 00 SOLENOID VALVE 3/2 should be used. For other machines which do not fall into this time period part number 414 00 941 00 SOLENOID VALVE 3/2 should be used.
