Type of vending machine:	HO Siamonie Smart

New motor for SMALLmill built-in grinder

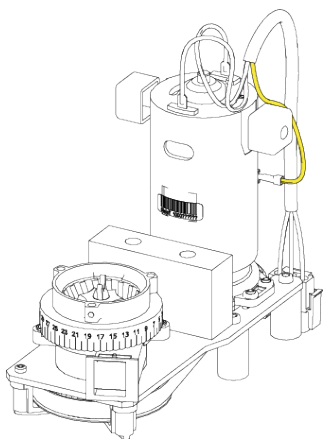

In future, we will be sourcing the SMALLmill built-in grinder from the Siamonie Smart series with a new motor.

Both the nominal performance data of the motor and the grinding capacity of the grinder itself are identical to its predecessor. The grinder therefore delivers the same constant grinding result.

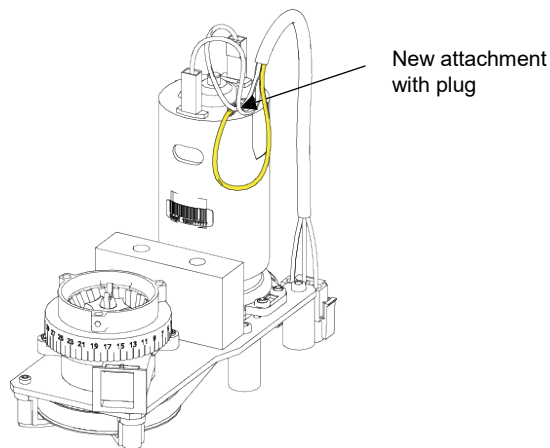

The new grinder can be recognised by the different connecting cable attachment, which in future will no longer be soldered but fitted with a plug on the motor.

From production week **27/2022**, the new built-in grinder with **serial number 90534619** will be used in series production.

Previous built-in grinder

New built-in grinder

The built-in grinder is compatible and can be ordered as a spare part under part number 417.01.010.00 *Small Mill built-in grinder left* or part number 417.01.011.00 *Small Mill built-in grinder right*.
