 Machine type(s): Siamonie Smart

New grinder cover

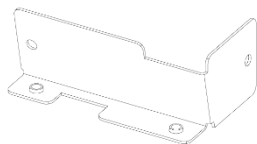

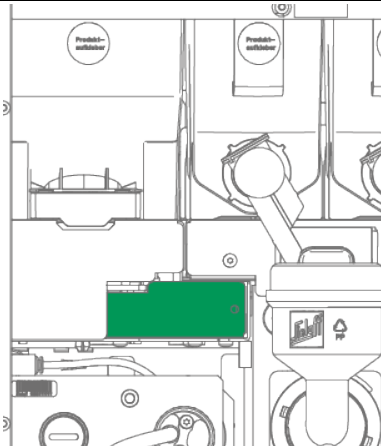

On the models from the Siamonie Smart series, the area between the grinder and the powder chute has been optimised.

A new grinder cover made from PA6 has been introduced to cover the area between the grinder outlet and powder chute more effectively. The new plastic cover replaces the metal one, sealing the machine area with a form-fit connection.

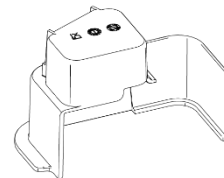

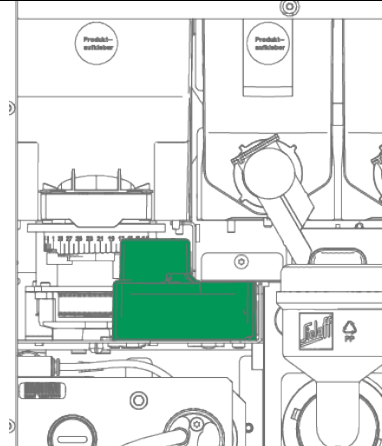

This change has also enabled us to integrate a feature for extracting any moisture that accumulates, as it has allowed us to create an opening for instant air extraction.

The new grinder cover will be fitted as standard from production week CW13/2023, machine serial number 90540613.

Previous grinder cover made from metal

New grinder cover made from PA6

The cover can be retrofitted on older machines by using the following conversion kits:

4175033300	Mono grinder cover conversion kit	
4175033400	Duo grinder cover conversion kit	
4175033300	Mono XL grinder cover conversion kit	
4175033400	Duo XL grinder cover conversion kit
