New grounds container

Due to a change in supplier, a new grounds container is now being used in the CVS, HG 20 Trend and SiLine HG TS machines.

The new tub is light grey instead of anthracite and has two plastic handles. The dimensions and filling capacity of the tub are exactly the same as before. The new tub can be ordered as a spare part under the existing item number: 412 00 181 00 “18 litre rectangular tub”.

The new tub will be installed in espresso type floor-standing machines starting from production week CW14 2024.
