

TECHNICAL INFORMATION

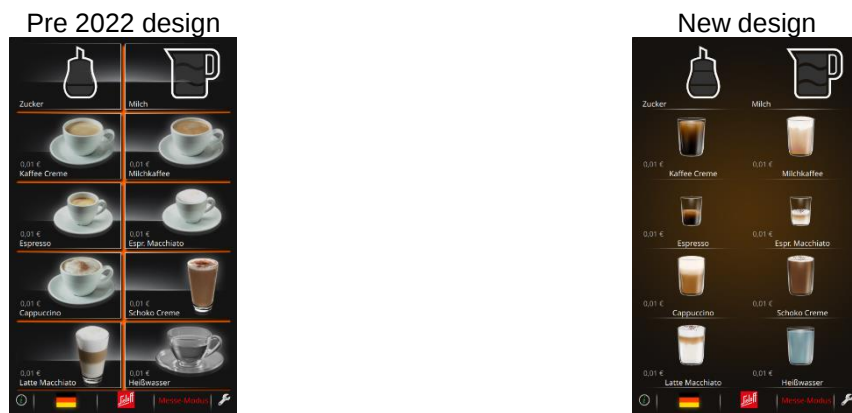

Date: 14.02.2023
TI: 2022
Type of vending machine: Siamonie Smart

Siamonie Smart Software 1.2.22.5

The new Siamonie Smart Software 1.2.22.5 offers new functions and optimises previous features. We would like to draw your attention to a few highlights.

User interface

The previous standard design (pre 2022) is available again. It can be downloaded from the Customer Centre at sielaff.de.

The interface of the licence menu for external software components has been harmonised with the interface of the SiLine series.

The language selection has been optimised.

Prices

Several price lists can be processed at once.

The internal processing of different price lists in cashless payment systems has been improved.

The display for filling up a coin mechanism in the Prices/Allocation menu has been improved.

Error messages

The internal communication of the vending machine has been improved.

Multiple errors are displayed depending on the order and prioritisation.

Language

The text "Please touch screen" is displayed in the respective language of the selection menu.

The following languages have been updated:

- French
- Dutch
- Norwegian
- Polish
- Danish
- Romanian
- Finnish
- Swedish
- Czech
- Hungarian
- Korean

Water tank

The wizard for changing the water filter has been optimised.
The program sequence of the water filter rinse has been optimised.
While the water filter is being rinsed, the slideshow is not displayed.

Update

Please note that from this software generation onwards, any update **MUST** be performed in the following order:

- 1 HMI
- 2 Remove the USB stick and insert it again.
- 3 VMC

HMI Update

1. At the vending machine: Open the machine door.
2. Connect the USB stick.
⇒ The HMI software recognises the USB stick and offers a software update.
3. Select [yes].
⇒ The software is updated
4. The service menu is displayed.
✓ The HMI has been updated.

VMC Update

Do not perform the VMC update until after the HMI update

1. At the vending machine: Open the machine door.
2. Connect the USB stick.
⇒ The question appears: Do you want to install the update now?
3. Select [no].
4. Select [General] [HMI Data Transfer] [Software Upload Control].
5. Select software (must be highlighted in blue)
6. Select [Send].
⇒ The software is sent to the controller. Do not remove the USB stick.
✓ The control unit software has been updated.

Download

You can find the latest software on our homepage in the [download centre](#).
