SiVend series software

The new SiVend series software comes with new functions and optimises previous features. Please take note of a few highlights.

FK

Auto-recognition has been improved for MTL.

Credit system:

The procedures between vending machine control and payment systems during the purchase process have been improved.

MDB restart after writing the EVADTS data after the next sale has been improved.

Localisation

Translation of the texts into Dutch has been improved.

Download

The latest software can be found on our Homepage in the [Download-Centre](#).
