Series software for snack and cold drinks machines

We would like to inform you of changes made to the software for our snack and cold drinks machines. Credit processing and display texts have been improved in the latest software versions. New functions have also been introduced.

We recommend updating machines despatched between February 2018 and July 2018 with series software xxMlj207.XX installed. If the machine works with data collection error 83 may occur.

FK current series software (from serial no. 90474082):

Machine	Control board	Software
FK	M32	FKMlj724.pat

FS / SÜ / SN current series software (from serial no. 90474085):

Machine	Control board	Software
FS / SÜ / SN/Softdrop	M32	FSMlj724.pat
FS /SÜ LM	M32	FSMlj724.lm

Robimat 75 / 99 current series software (from serial no. 90474203):

Machine	Control board	Software
Robimat 75 / 99	M32	FSMlj724.rob
Robimat 75 / 99 LM	M32	FSMlj724.rlm

Robimat XL / XM current series software (from serial no.: 90474906):

Machine	Control board	Software
Robimat XL / XM	M32	ROMlj904.pat

General developments for all types of equipment:

- Increasing the display size of the total sales counter (now to over 1 million, same as for hot drinks machines)
- Hotel mode implemented. Customer can activate the vend by entering a 4-digit code.
 - o New menu item in the Installation menu \ Machine
 - "Release operation" (On / Off).
 - "Activation time" 0 – 255 sec.
 - "Activation code" 4-digit.
- New menu item "equipment number" now added to the Installation menu \ Machine , as per EVADTS (Asset Number : ID106).
- Optimisation of display for currency values, which have no or only one decimal place.
- Optimisation of how banknotes are credited.
- Adjusting the two pricelists to MDB specification.
- DEX / UCS via an external series interface.
 - o Possibility to connect via HMI-interface.
- Limiting the number of repetitions for the communication process to the CGW to five.
- MDB improvements.
- EVADTS improvements.
 - o Statistics PA204 Field improvement.
 - o EA3 Field improvement.
- Languages updated (translations)

Robimat XL software:

- New menu item in Menu 10 Robimat:
 - o The recognised layout is displayed following the reference run. Fixing holes details counted from bottom to top. For ease of recognition every tenth hole has been numbered for some time on the container supports.

The Software-Updates detailed can be obtained free of charge from our Download-Center (<https://www.sielaff.de/kunden-login/>).
