

TECHNICAL INFORMATION

07. May 2021

TI0421

Machine type/s:

SiLine GF / SiLine SÜ

New SiLine Software 0.13.5

The new SiLine software offers new functions and optimises previous properties. Please take note of a few highlights.

The features listed below apply to all SiLine machines:

Payment systems

The executive log has been optimised. Potential display errors in the 'Price-Hold' mode have been removed (version 0.13.5 or higher).

The coin change level data processing has been optimised (version 0.13.2 or higher).

Localisation

The SiLine software is also available in Swedish (version 0.13.2 or higher).

Pricing

The pricing of a selection has been optimised (version 0.13.4 or higher).

Product texts can also contain quotation marks (version 0.13.4 or higher).

Special features of SiLine SÜ (spiral machine)

Lift offset

The lift offset adjustment has been optimised (version 0.13.2 or higher).

SiLine Public

The 'hardware keyboard' option is now supported for the SiLine Public variant. With this option, the touch-screen is covered by a pane. With this option, the product is selected using a hardware keyboard. The R key can also be used here to exit the service menu (version 0.13.2 or higher).

The SiLine Public hardware keyboard is continuously illuminated (version 0.13.5 or higher).

The software public mode has been optimised (version 0.13.2 or higher).

TECHNICAL INFORMATION

Update

The new software is installed on the following machines at the factory.

Machine	Software	Installed ex-factory for serial number
SiLine GF	0.13.5	90504601
