Installation instructions for AC compact fans

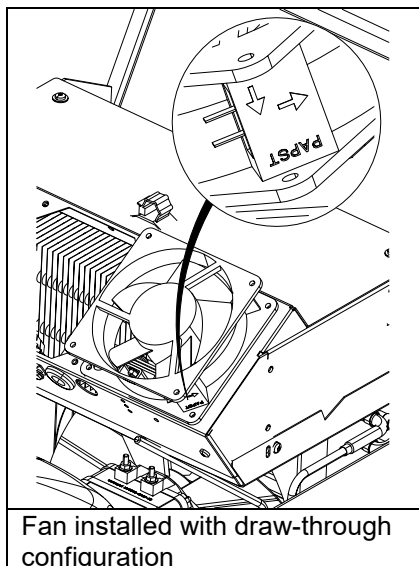

The evaporators in our refrigeration units are equipped with compact fans. Vending machine refrigeration units can be fitted with the following compact fans.

		
ebmpapst ACi 4420 H plastic housing Part no.: 9852750622	Shenzhen plastic housing Part no.: 9852760041	ebmpapst 4650N metal housing Part no.: 9852760003

Make sure that the airflow direction is correct. This is vital to ensure optimum cooling performance and trouble-free operation because compact fans can be installed with one of two airflow directions.

Caution:

SÜ 2020 2T LM fans must be installed with a draw-through configuration.

If spare parts are required, the compact fan can only be replaced by the following item:

9852760003	ebmpapst 4650N fan with metal housing	230V AC	18W
