SiLine Software 0.20.1

The new SiLine Software 0.20.1 comes with updated functions and new features. Here are just a few of the latest highlights.

Localisation

We have expanded and improved the display texts in the following languages:

- English
- French
- Lithuanian
- Dutch

Initial commissioning

We have optimised the initial commissioning procedure.

SiLine SÜ

We have optimised filling level maintenance.

SiLine GF

We have improved level configuration.

We have optimised filling level maintenance.

SiLine HG

We have optimised the initial vending machine commissioning procedure.

We have improved keypad control during Test vend mode if this is started from Product configuration using pre-selected products.

We have optimised the process for creating and editing allergens/additive lists.

We have made the hot drink vending process more robust in the event of the cup being removed too early: the sale is now cancelled should this occur.
