

TECHNICAL INFORMATION

Date: 31.12.2025
 TI: 1925
 Vending machine type(s): SiLine HG TS Series

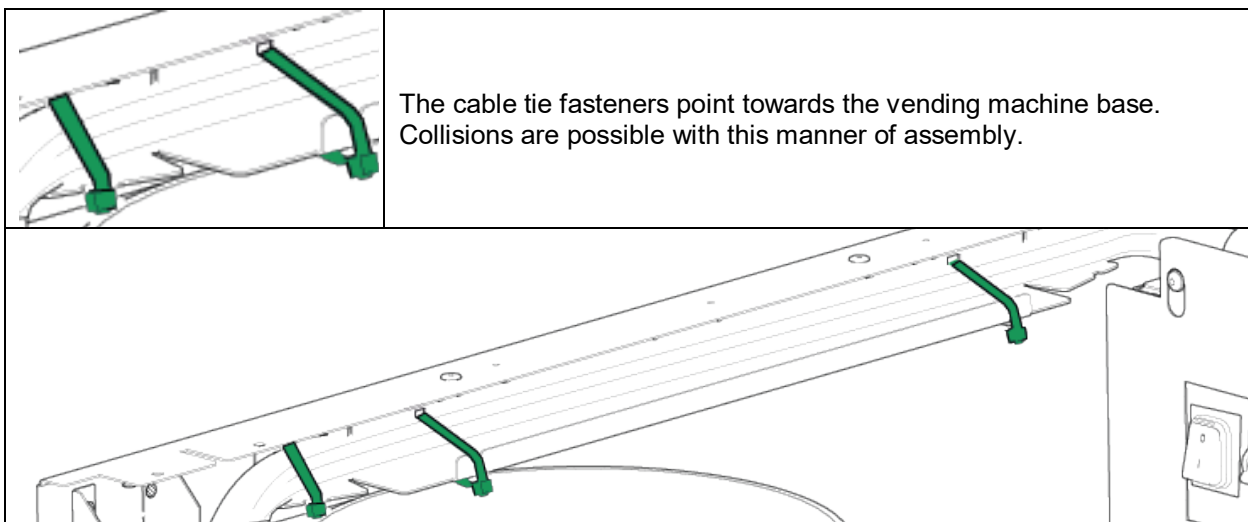

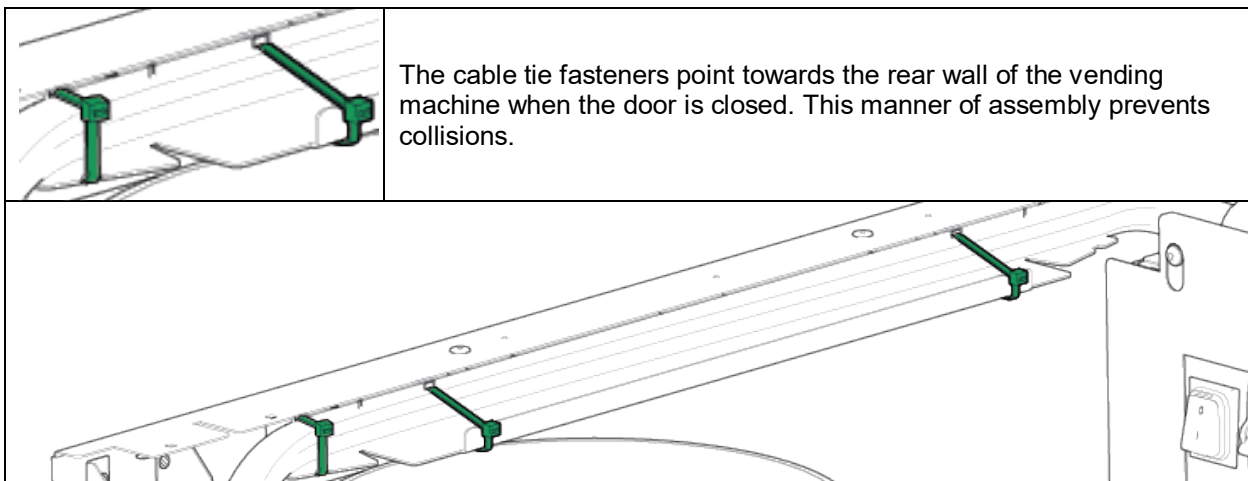

SiLine cable fastening HG TS Series

The cable harness holder (housing, item no. 419 00 410 00) has been modified and extended as part of product optimisation.

The modification aims to improve cable routing in and around the cable tray and to reduce potential collisions with moving components.

The modified cable harness holder will be fitted as a standard component from production week 36/2025 (from serial number 90569753)

Irrespective of this modification, it remains necessary to ensure that the cables are laid correctly in the area of the cable tray during service and maintenance so as to prevent any interference with cup stack rotation.
