SiLine Software 0.21.1

The new SiLine Software 0.21.1 comes with updated functions and new features. Here are just a few of the latest highlights.

Network and REST API

A REST API can now be activated. This interface enables vending machines to be controlled by a higher-level system. Amongst other things, it can be used to store and transfer data.

You can assign a host name to the REST API

We have optimised the network settings.

SiLine SÜ

We have improved the function that interrupts a vending process if the door is opened.

SiLine HG

We have improved the water quantity calculation when dispensing from two mixing bowls.

We have improved how mixing bowls are rinsed.

We have improved how faulty recipes are handled.
