SiLine SiOne;
SiLine HG;

SiLine Software 0.21.2

The new SiLine Software 0.21.2 comes with new features and updated functions. Here are just a few of the latest highlights.

SiLine SÜ

The lift position is now standardised for slender and broad vending machines.

SiLine HG

Another option has been added to the pot dispenser. Individual vendes can now be charged for the pot dispenser.

It is not necessary to restart the vending machine in the event of a subsequent activation of the dispensing light barrier. The dispensing light barrier is used for the 'Cup theft' and KBE (own cup) functions, among others.

The internal vending machine processes have been improved.

Download

The latest software version is available from the [Download centre](#) on our homepage.

Vending machine	Current software version	Installed at the factory for serial number
SÜ SiLine	0.21.2	90559334
HG SiLine	0.21.2	90562534
GF SiLine	0.21.2	90559436
RN SiLine SiOne	0.21.2	-
