14. January 2020

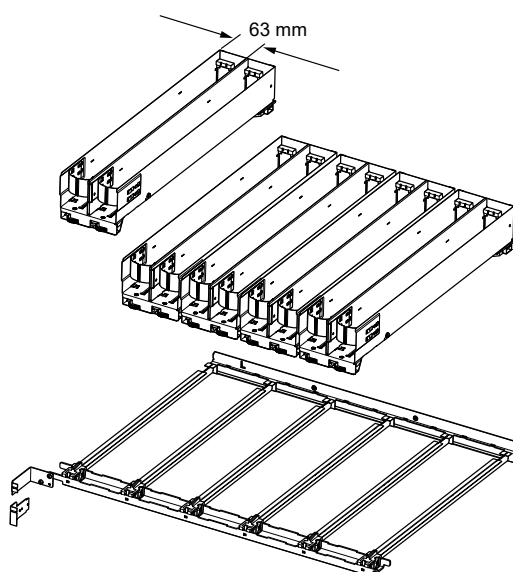

TI2919

Machine type/s:

SiLine GF / GF X-Series

New narrow compartment

As we continually endeavour to improve our products we have introduced a new narrow compartment for the GF X-series and SiLine GF. This compartment has a maximum width per selection of 63mm which enables one more selection per shelf, for example 0.25l slim can or 0.33l sleek can. This increases both the product range and machine capacity.

By using the following conversion kits the number of selections per shelf can be increased:

Part number	Description	Selections per shelf	Suitable for
707 50 600 00	Kit for 8 x 63 mm compartment shelf	8	SiLine GF M
705 50 600 00	Kit for 10 x 63 mm compartment shelf	10	SiLine GF
706 50 600 00	Kit for 8 x 63 mm compartment shelf	8	GF X-Series XM
704 50 600 00	Kit for 10 x 63 mm compartment shelf	10	GF X-Series XL

TECHNICAL INFORMATION

Please note that the new narrow compartment is not supported by a software version earlier than the following:

Machine	Software Version	Released on
GF SiLine L	Version 0.11.0	06.12.2018
GF SiLine M	Version 0.11.0	20.09.2018
GF X-Series XM	ROMHj920.pat	20.09.2017
GF X-Series XL	ROMHj920.pat	20.09.2017
