

TECHNICAL INFORMATION

14. December 2020

Machine type/s:

TI1520

SIELECTOR

New SIELECTOR Version 3.01

The following changes apply to all machines:

Microsoft.net Framework 4.6.1 has been updated. This is already included in Windows 10. For other versions of Windows you will be prompted to install this. The installation data for the .net Framework can be found in the Sielaff Download Centre (<http://www.sielaff.de/download-center/>). The installation data is already included on the data carrier supplied with a newly ordered SIELECTOR dongle.

Improvements have been made to the software. Recipes already in use can now be selected in Prices/Assignment,

The rinse time is limited to a max. of 10 s in the "Pre-rinsing mixer bowls" function. If the EVA-value for the rinse time is more than the Max Value, the EVA-Value is automatically adjusted to the Max Value (10 secs.). The mixer run time can be set to 255 max. via the diagram view as well as the .ini-Datei.

If an error occurs new helpful information is available.

Export function

Exporting data to Excel has been revised.

SiVend HG 20 TREND

The new software version offers the following benefits for this machine:
