

TECHNICAL INFORMATION

Date: 06.09.2022
TI: 1522
Type of vending machine: SiLine SÜ

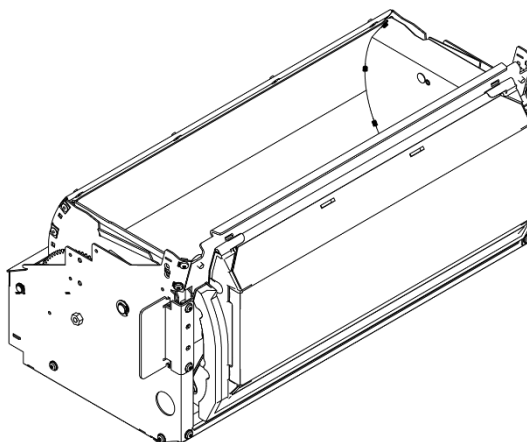

SiLine SÜ product delivery unit

The vending of the SiLine SÜ devices was revised during the course of continuous improvement.

Previous product delivery unit

New product delivery unit

With the introduction of the SiLine Public variants (type RP), the reinforced version of the motorised product delivery unit was taken over into all machines. The advantages are the standardisation of the spare parts and the maximum protection from damage and manipulation – also for “normal” locations.

Spare parts

Because of the change, additional parts need to be installed in the door of the vending machine in devices up to serial number 90503548 (once only). This is because of the new dimensions of the reinforced product delivery unit. The following conversion kits have been created for this:

Article number	Conversion kit for	Needed up to serial number
3435106600	SÜ SiLine Lift S	90503548
3435206600	SÜ SiLine S Light Barrier	90503548
3445006600	SÜ SiLine M	90503548
3445106600	SÜ SiLine Lift M	90503548
3445206600	SÜ SiLine Lift M Light Barrier	90503548
